

For each of the following experiment, predict before experimenting

	Experiment	What to observe?	Prediction	Actual Observation
1	Harmonica: Blow from both sides.	Sound produced is same or different?		
2	Harmonica: Take the air in instead of blowing.	Sound Produced?		
3	Oboe: Place the reeds of oboe in your mouth and suck air in instead of blowing.	Is sound produced? If yes, is it same as blowing?		
4	Oboe: Reverse and place in your mouth i.e. the side other than reeds is placed in mouth. Take the air in.	Is sound produced? If yes, is it same as blowing?		
5	Oboe: Place lips on reeds.	Is sound produced?		
6	Oboe: Close the straw hole at bottom.	Is sound produced?		
7	Vibrating Membrane: Place balloon level above pipe level.	Sound Produced? If yes, is it same as below pipe level?		
8	Vibrating Membrane: Close the pipe from bottom	Sound Produced? Different/Same?
